Financial and logistic operations

The system offers a number of complementary processes, such as logistics operations (receipts, returns, orders of goods), financial operations (receipt and withdrawal of money), closings and inventory application. The platform allows you to easily edit individual processes using the workflow system.

Promotions with guided selling and CRM

The flexible graduation system offers you a unique visual management of graduations, with which even the most complex graduations can be easily adjusted. It helps you sell more and faster with guided selling.

Customer Loyalty System (CRM) enables customer management, collection of points to different accounts and advanced segmentation. Combined with promotions, this is a powerful weapon against the competition.

The screenshot shows the Posigneo POS interface for a financial transaction. It displays the amount '11 500,00 Kč' and buttons for 'ZRUŠIT' (Cancel) and 'POKRAČOVAT' (Continue).
